-  418 Verificações aprovadas
-  span class="audit_important">23 Correções importantes
-  385 Correções semi importantes

Controlo

✓ Configuração de DNS

O nome do domínio com www e sem www deve ser indicado no mesmo endereço de IP

✓ redirecionar WWW

Esta opção verifica se o seu website corre com ou sem www para evitar o conteúdo duplicado.

✓ Reescrever o URL

Certifique-se de que reescreve os seus URLs depara que os seus utilizadores e os motores de busca os encontrem mais facilmente.

Os URLs do seu website não devem conter elementos vagos que dificultem a sua leitura. Todos os URLs devem ser claros e concisos. Com a ferramenta SEO Friendly URL é fácil posicionar o seu website nos motores de busca e partilhar artigos com URLs claros nas redes sociais. Não utilize underscores nos seus URLs.

✓ barras à direita

Se usar as barras à direita no final do URL está a torná-lo claro, se, pelo contrário, usar um URL sem barras ficará estranho.

✓ Robots.txt

É importante que use o ficheiro robots.txt no seu website pois este irá ajudá-lo a restringir o acesso aos robots do motor de busca e impedir que estes robots acedam a páginas específicas. Com o ficheiro robots.txt o motor de busca pode especificar a localização do mapa do site XML.

✓ Mapa do site XML

É importante criar [sitemaps em XML](#) para que os motores de busca rastreiem mais facilmente o seu website. Depois de submeter o seu mapa de site aos motores de busca, aconselhamos a que analise o seu comportamento para que melhore o seu desempenho. Pode gerar sitemaps em XML para URLs, imagens e videos, notícias e conteúdos móveis.

Deve definir a a frequência da mudança de cada URL, a data em que efetuou a última alteração e a importância dos URLs. Desta forma, os motores de busca podem rastrear o seu site de forma mais fácil e inteligente.

✓ Sem Flash

Quando otimizar o seu conteúdo para motores de busca, evite utilizar o Flash ao máximo. É preferível utilizar o Flash para melhorias específicas já que os motores de busca não conseguem indexar corretamente o conteúdo em Flash.

! Sem Frames**Resolver**

Evite ao máximo usar frames nas suas páginas web; em alternativa recorra à [tag NoFrames](#) no website.

✓ Variações normais da página de entrada

Certifique-se de que o conteúdo do seu website não tem vários URLs, caso contrário o Google vai considerá-lo conteúdo duplicado.

Análise de página

Aqui obtém todas as informações sobre ao seu website relativas aos últimos meses. Aqui se mostram os possíveis erros que os robots do Google podem encontrar ao rastrear o seu website. Obtém todas as estatísticas sobre as páginas com URLs demasiado longos, robots.txt bloqueados ou demasiado longos, meta tags Noindex, rel="canonical", rel="alternate", redirecionamento de atualização de meta, etc.

✓ 59 Páginas com resposta 2xx

✓ 1 Página com resposta 3xx

✓ 0 Páginas com resposta 4xx

✓ 0 Páginas com resposta 5xx

✓ 0 Páginas demasiado grandes

! 18 Páginas com URL demasiado longo

✓ 0 Páginas bloqueadas por robots.txt

✓ 1 Página bloqueada por meta noindex

✓ 1 Página bloqueada por meta nofollow

✓ 0 páginas com redirecionamento de atualização de meta

✔ 0 Páginas com rel="canonical"

✔ 0 Páginas com rel="alternate"

Análise de meta

Certifique-se de que os seus títulos e as meta description são originais; além disso, os títulos devem ter entre 10 e 70 caracteres e as meta descriptions devem apresentar 70-160 caracteres. Tanto os títulos como as meta descriptions devem incluir as palavras-chave importantes, já que as meta descriptions influenciam os resultados de pesquisa. Use as ferramentas do Google Webmaster para verificar se os títulos e as meta descriptions apresentam conteúdo duplicado.

✘ 11 Páginas com título duplicado

✔ 0 Páginas sem título

! 1 Página com título demasiado longo > 70

✔ 0 Páginas com título demasiado pequeno < 10

! 12 Páginas sem Descrição

✔ 0 Páginas com descrição duplicada

✔ 0 Páginas com descrição demasiado curta <50

! 3 Páginas com descrição demasiado longa >160

✔ 0 Páginas com código rel="canonical" duplicado

Análise de conteúdo

Lembre-se de que o conteúdo original é fundamental para os resultados do motor de busca. A estrutura do seu website deve incluir títulos HTML (h1-h6), onde deve incluir as palavras-chave importantes. O H1 deve ter as palavras-chave mais importantes. Não recorra a [conteúdo duplicado](#) nos seus títulos. A melhor aposta é usar h1, h2 e h3.

Escreva apenas conteúdo original e nunca duplicado; se for necessário reescreva o conteúdo e lembre-se de usar pelo menos 400 caracteres. Os artigos demasiado longos também são prejudiciais, pelo que é preferível mantê-los com um tamanho médio. Minimize ao máximo os erros de sintaxe e gramaticais.

✔ 0 Páginas com conteúdo duplicado

! 1 Página com poucas palavras < 250

✘ 1 Página sem H1

✘ 11 Páginas com tag H1 em falta

Análise de ligações

Certifique-se de que não tem mais de 100 ligações externas por página. Procure ligar-se apenas a websites de qualidade. Use [Nofollow tag](#) para ligações externas, caso não queira expor ligações não solicitadas aos motores de busca. Otimize o texto âncora das suas ligações com palavras-chave. Evite o uso excessivo das palavras-chave, nem use ligações de spam no seu website. Analise a estrutura das suas ligações internas com as [Ferramentas do Google Search Console](#): Search Traffic > Internal links.

✔ 0 Páginas com demasiadas ligações externas > 100

! 28 ligações internas sem âncora

! 216 ligações externas sem âncora

✔ 0 ligações internas com rel="nofollow"

✔ 0 ligações externas com rel="nofollow"

✔ 218 ligações externas com rel="dofollow"

! 54 ligações externas com estado 4xx

✔ 108 ligações externas

Análise de imagens

Para cada imagem crie textos ALT e títulos originais. No texto ALT não exceda as 7 palavras e evite o uso excessivo da palavra-chave. Torne as suas imagens informativas e detalhadas recorrendo a palavras-chave importantes. Use imagens de boa qualidade, atribuindo a cada uma altura e comprimento específicos.

 Favicon

Certifique-se de que tem um favicon no seu website e de que este é consistente com a sua marca. O favicon destina-se a dar ao seu website um ar profissional, tornando-o fácil de identificar com a sua marca.

Resolver

Crie um logotipo perfeito para o seu website, usando geradores de favicon gratuitos como o favicon.cc ou o favicon-generator.org. Crie o favicon com 16x16 pixels e faça o upload do ficheiro de favicon para o seu diretório de raiz com o formato `.ico`.

✔ Página 404 personalizada

Use uma [Página 404 personalizada](#). Se criar corretamente uma página 404 personalizada, ajudará os visitantes a encontrarem o conteúdo certo, oferecendo-lhe informações úteis e encorajando-os a permanecer no seu website.

Uma página 404 consiste numa mensagem de erro que o utilizador vê quando tenta aceder a uma página não existente no seu website, por esta ter sido eliminada ou por ter um erro no URL. A página 404 personalizada pode ser diferente do seu ISP e por não conterem informações úteis, levam muitos visitantes a saírem do seu website.

✔ Velocidade do website avg: 0 ms

É importante ter um [website de alta velocidade](#) já que este fator tem um enorme impacto no posicionamento do seu website. Um site de alta velocidade traz-lhe mais visitantes e taxas de conversão mais elevadas.

Resolver

Otimize o tempo de carregamento do seu website, analisando: tamanho das imagens, formato dos ficheiros de imagem, ausência de gráficos de texto, plugins desnecessários, caches, utilização de JavaScript no final do documento, ausência de redirecionamentos, código CSS e HTML desnecessário, ausência de múltiplos scripts de rastreamento, codificação G-zip, cabeçalhos de controlo de cache, redução do tamanho de cookies e atualização de software CMS.

✔ Navegação segura

Evite técnicas de phishing e de malware no seu website. Pode torná-lo seguro com a [Navegação Segura do Google](#).

✘ Validação HTML W3C

Certifique-se de que usa uma remarcação válida que não contenha erros de HTML. Os erros de sintaxe dificultam a indexação por parte dos motores de busca.

6 Errors, 1 warning(s)

Resolver

Verifique os erros no seu website com o [serviço de validação W3C](#) e certifique-se de que este cumpre os padrões da web.

✖ Validação CSS W3C

Ainda que não seja vital verificar a validação CSS, esta é aconselhável para estabelecer que o código funciona na perfeição e para detectar erros que possam ter escapado.

[Errors \(21\)](#) [Warnings \(183\)](#) [Validated CSS](#)

Resolver

Verifique as suas folhas de estilo em cascata [aqui](#).
